In this second batch of award announcement, 21 new winners brings the new total of TECS awards to 38. From over 220 submissions, these 21 were selected based on their commercial potential, scientific and technical strengths, cost-effectiveness and impact of their projects.

Proof-Of-Concept Projects

- [CardioRev Pte Ltd](#): A Novel Peptide-Eluting Coronary Stent
- [Double Helix Tracking Technologies Pte Ltd](#): DNA Verified(TM) Timber Origin
- [HVS Engineering Pte Ltd](#): A Novel Real-Time Energy & Cost Saving Cleaning System for Industrial heat Exchangers
- [Mesh.im Consultancy Pte Ltd](#): A cross-site interactive platform to integrate real-time communications online
- [Microspace Rapid Pte Ltd](#): Micro Fluidic Energy System Suite
- [Printed Power Pte Ltd](#): Printed Power enabled Active RFID Tags
- [Progeniq Pte Ltd](#): GPGPU-FPGA Accelerated Life Sciences + Visual Effects for High Performance
- [Qtech Nanosystems Pte Ltd](#): Development of Advanced Precision Driver System with Charge Switching Concept for Pico Positioning

Proof-Of-Value Projects

- [BioMers Pte Ltd](#): Development of High Stiffness Polymer Composite Arch-Shaped Wires with Rectangular Cross-Section
- [Bio-X \(S\) Pte Ltd](#): Bio-X: A Digital Camera Approach to Food Testing
- [Curiox Biosystems Pte Ltd](#): Point-of-Care Diagnostics Instrument for Immunoassays, Enzyme-linked Immunosorbent Assay (ELISA)
- [D-SIMLAB Technologies Pte Ltd](#): Symbiotic Simulation for Operational Decision-Making in Asset-Intensive Industries
- [Hiperware Pte Ltd](#): HiperSearch Appliance
- [I-Flapp Technologies Pte Ltd](#): Mobility Technologies for Universal Computer Applications
- [Niometrics Pte Ltd](#): Next-Generation Firewalls for Network Threat and Risk Management
- [Pechora Technologies Pte Ltd](#): IP Camera Platform and Virtual IP Cameras leveraging [HomeCamera](#)
- [Pipeline Micro Pte Ltd](#): Semiconductor Cooling Micropump

Rolling Applications

Previously, applications for [TECS](#) had deadlines but now, you can apply all year round. But applications will still be batched together for evaluation on a 'regular basis'.

Summary of TECS

The \$75 million TECS was launched by SPRING Singapore in April last year to provide technology start-ups and enterprising public sector researchers with early-stage funding support to R&D projects either at the Proof-of-Concept (POC) or Proof-of-Value (POV) stages. The POC grant seeks to develop technology ideas early on from the conceptualisation stage by providing full funding of up to \$250,000, while the POV grant provides 85% co-funding up to a maximum grant of \$500,000 to further R&D and develop the POV or first working prototype.
