Vanguard's 15kN Quick Release Hook System is a dual-function hook with On-load and Off-load capabilities.

Our hooks comply and conform to the latest guidelines and regulations of the SOLAS and IMO guidelines and regulations. All of them come fitted with Fall Preventive Devices (FPDs) attached with reflective warning tags following the IMO/MSA 1327 and subsequently IMO/MSA 1392 guidelines.

Our hooks are suitable for use with Inflatable and Rigid Rescue Boats, differentiating itself from the Quick Release Hooks available in the market with its ability to take up to 1.5 tons in weight as compared to the normal 1.3 tons available in the market.

Certified by Lloyd Register, Vanguard's 15kN Quick Release Hook is an exciting, highly anticipated new addition to the market!

It offers to the marine industry safety assurance and servicing is required only every 5 years.
